Amendments to the Claims

Please amend claims 1 and 5-20 as follows.

Please cancel claim 4.

Please add new claims 24-26 as follows.

1.   (currently amended) In a computer network, a method comprising,

    <u>receiving a request from a requester at a my-services schema for location information of a user identity-based services schema, wherein the my-services schema describes the available services for a given user identity, the my-services schema having a schema that maintains data about other services in one or more service-related fields;</u>

    <u>providing location information to the requester regarding the requested user identity-based services schema, wherein the requested user identity-based services schema to organize data associated with a user of the computer network based on an identity of the user, the user identity-based services schema having services-related fields arranged into a content document with defined structures for the fields;</u>

    ~~providing an identity-based services schema, the services schema having services-related fields arranged into a content document with defined structures for the fields;~~

    receiving a data access request directed to service information<u> at the user identity-based services schema</u>, the request including associated <u>user</u> identity information; and

    in response to the data access request, manipulating at least one set of data in a logical services document that includes data therein according to the associated identity information, each set of data in the logical services document structured to correspond to a field in the content document.

3/11

2.   (previously presented) The method of claim 1 wherein manipulating at least one set of data comprises reading data from at least one field in the logical services document.

3.   (previously presented) The method of claim 1 wherein manipulating at least one set of data comprises writing data to at least one field in the logical services document.

4.   (cancelled)

5.   (currently amended) The method of claim 1 wherein the <u>user identity-based</u> services schema corresponds to an application settings service.

6.   (currently amended) The method of claim 1 wherein the <u>user identity-based</u> services schema corresponds to a calendar service.

7.   (currently amended) The method of claim 1 wherein the <u>user identity-based</u> services schema corresponds to a categories service.

8.	(currently amended)	The method of claim 1 wherein the <u>user identity-based</u> services schema corresponds to a contacts service.

9.	(currently amended)	The method of claim 1 wherein the <u>user identity-based</u> services schema corresponds to a devices service.

10.	(currently amended)	The method of claim 1 wherein the <u>user identity-based</u> services schema corresponds to a documents service.

11.	(currently amended)	The method of claim 1 wherein the <u>user identity-based</u> services schema corresponds to a favorites service.

12.	(currently amended)	The method of claim 1 wherein the <u>user identity-based</u> services schema corresponds to an inbox service.

13.	(currently amended)	The method of claim 1 wherein the <u>user identity-based</u> services schema corresponds to a lists service.

14.	(currently amended)	The method of claim 1 wherein the <u>user identity-based</u> services schema corresponds to a location service.

5/11

15.   (currently amended) The method of claim 1 wherein the <u>user identity-based</u> services schema corresponds to an alerts service.

16.   (currently amended) The method of claim 1 wherein the <u>user identity-based</u> services schema corresponds to a profile service.

17.   (currently amended) The method of claim 1 wherein the <u>user identity-based</u> services schema corresponds to a presence service.

18.   (currently amended) The method of claim 1 wherein the <u>user identity-based</u> services schema corresponds to a wallet service.

19.   (currently amended) ~~In a computer network, a method comprising,~~

~~receiving a data access request, the request including associated identity information;~~

~~accessing a data store to obtain data based on the associated identity information;~~

~~constructing a document including at least part of the data and including a defined user identity-based services schema to organize data associated with a user of the computer network based on an identity of the user; and~~

The method of claim 1, further comprising returning the logical services document in response to the data access request.

20.   (currently amended) The method of claim ~~19~~ 1 wherein the user identity-based services schema includes at least one defined field for extending the user identity-based services schema.

21-23. (cancelled)

24.   (New) The method of claim 1 wherein the location information includes a uniform resource identifier, realm information of a Kerberos domain controller (KDC), and a service principal name for obtaining an identity license from the KDC.

25.   (New) The method of claim 1 wherein the location information includes a uniform resource identifier and an identity license.

26.   (New) The method of claim 1 wherein the location information includes referral information that points to another my-services schema.
